Thank you!

We have raised \$11,720 in our initial efforts to provide grants and scholarships in her name. We are grateful for the abundant response from the community. Thank you so much for your donation. We acknowledge the work that is necessary to make the strides in ophthalmology and are making progress in our gift aid selection process. You have directly contributed to our goal benefitting medical students, residents and fellows who are under-represented in medicine with interest in ophthalmology and research. As we move into 2021, we look to increase our fundraising goal to \$100,000. The amount will fund the many organizations and educational institutions seeking aid. We have no doubt that we are able to achieve this goal together! We encourage you all to continue to share and contribute in any way possible.
